

Cognigy, the emerging high-tech conversational AI startup company from Düsseldorf, takes intelligent conversations to a new level. Cognigy.AI is our Conversational AI platform for automating enterprise service processes. Cognigy.AI enables organizations to engage in natural dialog with users on each conversation channel, such as chatbots, virtual assistants, and by phone. Founded in 2016 by Philipp Heltewig and Sascha Poggemann.

React Frontend Software Developer – Great Culture – Big Impact – Conversational Artificial Intelligence (m/f/d)

Do you love the thrill of rapid growth, but would rather avoid the grind of the early stage start-up and the bureaucracy of a large company?

Cognigy is a profitable company with a great culture, proven technology, a scalable business model, meaningful revenues, glowing client references, a patent in NLP technology, and has won numerous awards.

For the React Frontend Developer with a proven track record developing user friendly applications through the rapid growth phase, this is the rare opportunity you've been seeking.

Your proven expertise will help us accelerate the development of our Enterprise Conversational AI Solution and launch our company into orbit.

As one of our leading Cognigy developers you will play an integral part in delivering a game-changing experience for our Conversational AI backend application, that will transform the way companies build conversational dialog flows, to engage with employees and customers using Cognigy's conversational AI technology.

Working with an experienced and motivated team, you will evolve our application using your knowledge to interlock HTTP APIs with front-ends. You will be rendering in React using the material UI library.

You should already have experience with real-time communication based on Websockets (with libraries like socket.io or sockjs) to develop user friendly systems with style and intuitive user experience.

By joining the Cognigy AI developer team, you can become a leading developer, who will thrive on our fast-paced team and enjoy the perks of a rapidly-growing industry leader.

We offer **good compensation** and a very compelling **virtual stock option plan** to let you participate directly in the company's growth and success.
